

Managing Risk as Part of a Project Team

Play your part in effective project risk
management

www.ecitb.org.uk

Overview

This introductory one day workshop teaches anyone within a project team how they can participate in effective project risk management.

Delegates are introduced to risk terminology, the risk management process, associated human factors and develop their understanding of the tools and techniques commonly used in good practice by participating in a series of group exercises, based around an interesting engineering construction scenario.

The workshop has been produced in response to industry identifying a requirement for specialised short training courses targeting specific functions within the project lifecycle. Of these, risk management was identified as the subject area with the highest priority. The content has been developed by subject specialists from a specification created by a representative industry working group.

Course Objectives

The objective of this course is to enable delegates to:

- Appreciate the importance of the need for risk management to ensure project success.
- Recognise risk management is all about making conscious decisions.
- Gain a common understanding of the risk management process.
- Converse in common language across the project team.
- Recognise their specific role in the team and the part they play is an integral part of the entire plan.
- Understand the practical implementation of the risk management plan.

So that delegates can:

- Effectively participate in risk management throughout the lifecycle of the project.

Course Content

The course is structured as follows:

- Introduction to the workshop.
- Why projects fail or succeed.
- Introduction to risk.
- The risk management plan.
- Risk identification.
- Risk identification exercise.
- Risk assessment (inc human factors).
- Risk assessment exercise.
- Prioritisation of risks.
- Planning risk responses.
- Planning risk responses exercise.
- Implementation (inc risk ownership).
- Lessons captured (from post project review).
- Summary and personal development.

Overview

The course is delivered as a one day tutor-led workshop, starting at 0900 and finishing at 1700. It is participative in nature, utilising presentation sessions to support group discussions and exercises.

A small amount of delegate pre-course reading is recommended in order to gain the maximum benefit from the day.

ECITB grants are available to registered employers.

To book a course, or a course place, and to confirm grant availability, please discuss your requirements, in the first instance, with your ECITB Regional Account Manager.
