What is the Engineering Construction Scholarship Energy Transfer Technician (ETT) Programme?

The Engineering Construction Industry Training Board (ECITB) are working in partnership with a number of training providers to offer an excellent opportunity for those aspiring engineers of the future that wish to pursue a career within the Engineering Construction Industry (ECI).

The ECITB's ETT Scholarship Programme is a two-year course that will support learners to pursue a full time off the job programme in two technical disciplines.

During their studies, ETT Scholars will acquire Nationally recognised engineering qualifications as well receiving other skills training relevant to their chosen discipline.

The scheme offers employers an excellent opportunity to recruit a young person who has had the requisite training to be progressed into a Higher level apprenticeship or be recruited as a direct site hire. To support the learners on this full time programme the ECITB will pay an allowance of £140/week during term time.

What are the Pre-Requisites?

As this is a challenging programme, prospective applicants should have a Nationally recognised Engineering Knowledge Qualification in a related subject at Level 3 or Equivalent.

What does it involve?

- Skills and knowledge training for five days a week over two academic years.
- ECITB Digital Passport.
- ECITB Level 3 Diploma in 2 disciplines.
- HNC in Engineering.
- ILM level 3 qualification.
- Introduction to Net Zero.
- Creative thinking.
- ECITB Small Bore Tubing training.
- A Health and Safety Passport (CCNSG) and Behavioral Based Safety training.
- Interaction with ECI employers.
- £140 a week learner allowance during term time.

Becoming trained and qualified in one of the following Multi-Disciplined Technician Pathways:

- Mechanical maintenance and Electrical maintenance
- Electrical maintenance and Instrumentation and control
