

ECITB APPROVED TRAINING PROVIDERS FOR PROJECT CONTROLS

ECITB is driving forwards skills and safety training for the engineering construction industry. We specialise in the development of skills, standards and qualifications for the engineering construction workforce. As an integral part of this, the ECITB approves training providers to deliver training and assessment for more than 80,000 learners each year. There are currently more than 200 approved training providers in the UK and internationally delivering the full range of ECITB products of which management and professional project control are a part.

Why use an ECITB approved training provider?

ECITB audits approved training providers, using effective governance and specialist know-how so that companies can be assured that when they use an approved training provider, to deliver ECITB approved training, the quality and content of the training will meet their requirements.

Current ECITB approved training providers for M&P

Approved training providers deliver both ECITB developed courses and courses they have developed against ECITB approved training standards. Courses that are scheduled to be run can be found at www.ecitb.org.uk Current approved training providers and brief information on courses they are approved to deliver are: (correct July 2022, this information is updated twice a year):

 <p>www.2020projectmanagement.com/courses/ecitb</p>	<p>ECITB Training Provider of the Year 2015, 20/20 Project Management, play an essential role in the delivery of Project Controls training to the Engineering Construction Industry. Using ECITB's suite of training standards, we strive to deliver appropriate training to the right people using the most effective delivery methods. Our facilitators have huge experience within the Engineering Construction Industry making all training relevant, fun and engaging.</p>
 <p>www.goforth.org.uk</p>	<p>GO FORTH were established in 2019. Through our world-leading project controls expert Shane Forth, we provide project control solutions including training and consultancy services to the international engineering and construction industry and beyond.</p> <p>Currently delivering the ECITB project controls, estimating, risk management and document managers courses. all courses are facilitated through our specially configured virtual instructor-led classroom.</p> <p>Our customers readily acknowledge our personal service and excellence in meeting their business and operational requirements to help their people to manage and control projects well.</p>
 <p>www.kingsfieldacademy.com</p>	<p>Kingsfield Academy is a leading training and coaching provider for the international engineering and construction industries helping companies to develop their commercial competencies for project delivery. Our Programs cover critical capabilities such as managing scope, contract, risk, change and time on projects, applying appropriate project control measures and leveraging project leadership behaviours and stakeholder relationships.</p> <p>Currently delivering the ECITB estimating course, and coaching on the use of the ECITB Project Collaboration Toolkit, and also delivering ECITB approved courses in commercial awareness, competitive tendering, risk management and contract management.</p>
 <p>www.projectcontrolsolutions.com</p>	<p>Project Controls solutions specialises in developing customised project controls training solutions to create a future of project controls professionals. We are delighted to deliver the ECITB suite of Project Controls Courses in support of our aim to enhance project controls skills, equip project controls professionals to see the big picture and to be able to make an impact on their projects on day one. Investing in our training enables project controls professionals to think critically, conduct rigorous analysis and generate recommendations to support successful project delivery.</p> <p>Our trainers each have over 20 years of real-world project controls experience and are recognised experts in the global business community.</p>

ECITB APPROVED ASSESSMENT CENTRES FOR OFQUAL ACCREDITED QUALIFICATIONS

The ECITB approves assessment centres to safeguard effective and efficient delivery of assessment for its Ofqual-approved qualifications. There are approved assessment centres in the UK and internationally, managing arrangements and delivering assessments for the full range of regulated vocational competence and knowledge-based qualifications, of which management and professional project control are a part.

Regulated qualifications – sometimes called accredited qualifications – are recognised, reviewed and monitored by regulatory bodies in order to ensure they meet specific criteria and quality standards.

ECITB is an Ofqual approved Awarding Organisation and, as such, has approved the following organisations to assess and award ECITB's regulated qualifications (Nov 2021):

- Level 3 Diploma in Project Controls Practice and Techniques (RQF)**

Approved assessment centre	Contact	Telephone
20/20 Business Insight Limited	Phil Jefferies: Phillip.jefferies@2020projectmanagement.com	01224 443666
