

The background of the entire page is a photograph of two young men in a classroom or study setting. The man in the foreground is wearing a blue and white checkered button-down shirt and is looking directly at the camera with a slight smile. He is sitting at a wooden desk. Behind him, another young man is visible, wearing a light green shirt, looking down at a laptop. Large, semi-transparent, light grey geometric shapes, resembling stylized letters or abstract forms, are overlaid on the right side of the image. The ECITB logo is in the top left corner.

What is the Engineering Construction Scholarship Programme?

The Engineering Construction Industry Training Board (ECITB) are working in partnership with a number of training providers across England, mainland Scotland, Shetland Island and Wales to offer an excellent opportunity for those aspiring engineers of the future that wish to pursue a career within the Engineering Construction Industry (ECI).

Now in its third year and with over 360 learners already having either enrolled on, or completed the programme, the ECITB Scholarship is a one* or two-year course that will support learners to pursue a full time off the job programme in a craft or technical discipline. During their studies learners will acquire Nationally recognised engineering qualifications as well receiving

other skills training relevant to their chosen discipline. The scheme offers employers an excellent opportunity to recruit a young person who has had the requisite industrial training to be either fast-tracked into an apprenticeship or be recruited as a direct site hire for further progression in the workplace.

* Available in craft disciplines, Level 2 (SCQF level 5) is a one-year programme and Level 3 (SCQF level 6/7) is a two-year programme.

What does it involve?

- Skills and knowledge training for up to five days a week over one or two academic years.
- ECITB Digital Passport.
- ECITB foundation and work based online knowledge test.
- Gaining Nationally recognised industry qualifications.
- A Health and Safety Passport (CCNSG).
- Interaction and workplace experience with ECI employers.

Available in the following occupations:

Craft:

- Pipefitting.
- Mechanical Installation.
- Electrical Installation.
- Rigging and Erecting.
- Fabrication/ Welding.
- Industrial Welder (Pipe or Plate).

Technicians:

- Design and Draughting.
- Project Control.
- Mechanical maintenance.
- Electrical maintenance.
- Instrumentation and control.
- Energy Transfer Technician.
- Wind Turbine Technician
