CCNSG Test-Only Route for Renewal

The Client Contractor National Safety Group (CCNSG) passport is the main safety card scheme for the Engineering Construction Industry. The CCNSG card is required to enter many engineering construction sites and around 30,000 people complete the course each year.

The CCNSG Test-Only for Renewal route is only for those who already hold a valid CCNSG Safety Passport, but whose card is due for renewal. This test, which is an alternative to attending a one-day renewal course, has to be taken within three months before the Safety Passport expiry date.

Delegates must complete 60 online questions which cover the syllabus of the one-day renewal course. The pass mark for the online test is 80%; delegates who do not achieve the required pass mark will be permitted one further resit. If the delegate fails to achieve the pass mark on the resit then the one-day renewal course will have to be taken.

*No training or assistance will be given at the test session so delegates must ensure they have the required health and safety knowledge in preparation for the test.
