

A photograph of two young men, ECITB scholars, working in a workshop. They are wearing dark blue work jackets with the ECITB logo and safety glasses. One scholar is using a tool to work on a metal piece held in a vice, while the other is assisting. The background shows a typical workshop environment with various tools and equipment. A large, semi-transparent graphic of a stylized 'X' or arrow shape is overlaid on the right side of the image.

What is the Engineering Construction Scholarship Programme?

The Engineering Construction Industry Training Board (ECITB) are working in partnership with Training providers to offer an excellent opportunity for those aspiring engineers of the future that wish to pursue a career within the Engineering Construction Industry (ECI).

Now in its fourth year and with over 360 learners already having either enrolled on, or completed the programme across England, Scotland, and Wales, the ECITB Scholarship will support learners to pursue a full time off the job engineering programme.

During their studies learners will acquire Industrial skills and knowledge as well as an Industry recognised qualification and CCNSG Safety passport. The scheme offers employers an excellent opportunity to recruit a young person who has had the requisite industrial training to be either fast-tracked into an apprenticeship or be recruited as a direct site hire for further progression in the workplace.

Successful applicants will receive a learner bursary of £60/week subject to attendance during term time.

What does it involve?

- Industrial skills and knowledge training for 3-5 days a week over one academic year.
- Online content - ECITB Digital Passport, clean energy technologies and behavioural based safety.
- ECITB Pre Employment Programme which includes:
 - CCNSG safety passport.
 - Working safely with hand tools, power tools and equipment.
 - Manual Handling.
 - Low risk Confined Space.
 - Working at Height.
 - Abrasive Wheels (Handheld and Bench Mounted).
- Regular meetings with ECI employers looking for new talent.
- Work placements with ECI employers.
