

A photograph of two young men in a workshop setting. They are both wearing dark blue work jackets with 'EC ITB*' printed on the chest and safety glasses. The man on the left is using a hand tool on a piece of metal held in a vice. The man on the right is holding a long metal rod. The background shows a workshop with various tools and equipment. A large, stylized, semi-transparent graphic of a person's head and shoulders is overlaid on the right side of the image.

What is the Engineering Construction Scholarship Programme?

The Engineering Construction Industry Training Board (ECITB) is working in partnership with training providers to offer an excellent opportunity for those aspiring engineers of the future that wish to pursue a career within the Engineering Construction Industry (ECI).

Now in its fourth year and with over 500 learners already having either enrolled on, or completed the programme across England, Scotland, and Wales, the ECITB Scholarship will support learners to pursue a full-time off-the-job engineering programme.

During their studies learners will acquire industrial skills and knowledge as well as an industry-recognised qualification and CCNSG Safety passport. The scheme offers employers an excellent opportunity to recruit a young person who has had the requisite industrial training to be either fast-tracked into an apprenticeship or be recruited as a direct site hire for further progression in the workplace.

Successful applicants will receive a learner bursary of £60/week subject to attendance during term time.

What does it involve?

- Industrial skills and knowledge training for 3-5 days a week over one academic year.
- Online content - ECITB Digital Passport, clean energy technologies and behavioural based safety.
- ECITB Pre Employment Programme which includes:
 - CCNSG Safety Passport.
 - Working safely with hand tools, power tools and equipment.
 - Manual handling.
 - Low risk confined space.
 - Working at height.
 - Abrasive wheels (handheld and bench mounted).
- Regular meetings with ECI employers looking for new talent.
- Work placements with ECI employers.

About the ECITB

The ECITB is the employer-led skills body for the Engineering Construction Industry in Great Britain.

A non-departmental public body sponsored by the Department for Education, the ECITB works with employers and government to attract, develop and qualify personnel across a wide range of craft, technical and managerial disciplines.

Since 2020, the ECITB has invested more than £48 million on training within the engineering construction industry, including support for 4,000 new entrants.
